Top 10 Reactome pathways enriched in  
'Fusarium verticillioides' vs 'control' in 'susceptible to Fusarium verticillioides'  
(Fisher-exact, FDR < 0.1)

9045731 – Jasmonic acid signaling  
9045732 – Salicylic acid signaling  
9045555 – IAA biosynthesis I  
9045620 – isoleucine biosynthesis from threonine  
9045614 – sucrose biosynthesis  
9045576 – valine biosynthesis  
9045623 – galactose degradation II  
9045640 – phenylalanine biosynthesis I  
9045624 – methylerythritol phosphate pathway  
9045682 – suberin biosynthesis
